

Alif Alamsyah Yudhanto

Frontend Engineer

+62813-5791-9691 | alamsyaah1198@gmail.com | Jl. Danau Rawa Pening 1 H5 A 24 Malang

Profile

Dedicated Front-End Software Engineer specializing in React. Expertise in creative and effective user interface development. Highly proficient in TypeScript, and skilled in React Native for robust cross-platform mobile application development.

Skills

- Web Development
- Mobile Development
- React
- React Native
- Node.js
- Typescript

Work Experience

Software Engineer (Front-End) | Ruangguru

2022 - Present

- Engineered an internal test case management system using React and Remix, effectively replacing the costly TestRail subscription and significantly reducing operational expenses.
- Developed and maintained Skillacademy using the Tamagui UI framework, establishing a unified component approach that ensured cross-platform consistency and required only one point of update for all web and mobile features.
- Led the migration and development of Ruangkerja, building a comprehensive LMS with advanced features like SSO, content security (watermarking), and white-label support for enterprise clients.

Front End Developer | E-CDD Pegadaian

2021 - 2022

- Created a web application for the submission process of the national pawnshop using Next.js and Chakra UI.

Front End Developer | YAMALUBE MICROSITE

2021

- Developed a microsite to handle the exchange of Yamalube oil lottery codes using React and Ant Design for UI components.

Android Developer (Freelance) | JM Network

2020 – 2021

- Contributed to a project as a Freelance Developer to build a medical system application.

Education

- Computer Science, Brawijaya University

2017 – 2025

Achievement

- Gold Medal, International Research Innovation Invention Solution Exposition (IRIISE), University of Malaya

2018
